INTERNAL RISK FACTORS:

1. Our Promoters have limited experience in the steel industry, which could have an adverse effect on the Company's results of operations and financial condition.

The production of steel requires a high proportion of investment in fixed assets such as land, plant and machinery. Further, setting up of new capacities or expansion of existing capacities requires relevant experience and expertise in the steel industry. To gain versatile experience in manufacturing of Stainless Steel (SS), we had taken manufacturing Unit I (Halol), Gujarat, on November 29, 2019 on lease/license basis having installed manufacturing capacity of 66000 MT/p.a. of SS Billets and Unit II (Changodar), Gujarat on November 29, 2019 on lease/license basis having installed rolling capacity of 90,000 MT/p.a. of Flat bars.

Our company had proposed an amount of ₹ 4817.70 Lakhs against the total claim of ₹ 24355.87 Lakhs against the Corporate Debtor. The total haircut under the proposed plan was 80.22%. The Bankers of the Corporate Debtor had issued Bank Guarantees amounting to Rs. 411 lakhs to electric supply company for electric connections to manufacturing unit of Agarwal Mittal Concast Private Limited. As per the Resolution Plan submitted by our Company these bank guarantees were to be replaced by our company or to be reimbursed by our company in case of invokement. The NCLT vide its order no. IA NO. 368/2021 in CP (IB) NO. 533/AHM/2018 passed on December 13, 2021 approved the resolution plan submitted by our company for M/s. Agarwal Mittal Concast Private Limited. As on the date of Prospectus, in adherence with the Resolution plan and NCLT order, our company has made Entire payment of Rs. 4817.70 Lakhs towards acquisition of Agarwal Mittal Concast Private Limited. Further, Our Company has paid Rs. 42.36 Lakhs (including interest and additional charge) towards the Stamp duty as per Resolution Plan. Additionally, the company has replaced bank guarantees totaling to Rs. 260.33 Lakhs and also reimbursed Rs.136.86 Lakhs towards bank guarantees invoked by electric supply company. Consequently, the Agarwal Mittal Concast Private Limited is deemed to be Amalgamated with our Company on effective date i.e. May 27, 2022 being Date of last payment under resolution plan

with effect from appointed date i.e date of NCLT Order being December 13, 2021. Our Company is under process to give necessary impact of amalgamation of AMCPL with our Company.

In addition, our Company has submitted the Resolution Plan under section 30(6), 31 and section 60(5) of Insolvency and Bankruptcy Code, 2016 read with Regulation 39(4) of the Insolvency and Bankruptcy Board of India (Insolvency Process of corporate Persons) Regulations, 2016, on January 04, 2021 & Final Resolution Plan on March 30, 2021.with the Resolution professional for taking over the (**Unit II)** belonging to company M/s. Vicor Stainless Private Limited (Lessor company/Corporate Debtor). Our company has proposed an amount of ₹ 635 Lakhs against the total claim of ₹ 1661.88 Lakhs against the Corporate Debtor. The total haircut under the proposed plan was 61.79%. Our company has received the Letter of Intent dated April 13, 2021 from the Resolution Professional of Vicor Stainless Private Limited and has given the acceptance of the same. As per the requirement, our company has also submitted the requisite Performance Guarantee. As on the date of prospectus, our company is awaiting for the approval of the resolution plan from the NCLT.

Our Promoters have limited experience in the steel industry, which may adversely affect the quality and consequently the profitability of our business. The limited experience of our Promoters in steel sector may also make it more difficult to attract and retain our customers. This may result in losses, which may have a material adverse effect on our business prospects and financial condition.

2. We do not own our factory premises and not certain about the period for which we are allowed to occupy the said premises.

Our Registered Office and Manufacturing Plants are not owned by our company and are taken on lease basis.

Registered Office has been taken on long term lease basis from one of our Promoter Director for 5 years w.e.f. October 21, 2021, which is not registered with respective state government authorities.

We had entered into a lease agreement for Unit II (Changodar) with M/s. Vicor Stainless Private Limited (lessor), vide lease agreement dtd. November 29, 2019 for a period of 364 days with an option to renew the same. Although we have not entered into any renewal agreement in respect of the said premises, we have entered into a Memorandum of Understanding on October 13, 2020 with the resolution professional acting on behalf of the lessor. The period of lease has not been defined in the MOU. The validity of the MOU is upto the date of any adverse order being under the Insolvency and Bankruptcy Code, 2016 and we may be required to vacate the premises with a notice period of 1 month. In the event we fail to make arrangement for shifting our operations within the given time period, our capability of fulfilling our orders may be adversely affected and we may incur losses.

If lessor does not renew said premises, we may have to find alternate premises for our operational and administrative work which will significantly affect revenue from operations and profitability of our company.

Consequently, the Agarwal Mittal Concast Private Limited is deemed to be Amalgamated with our Company on effective date i.e. May 27, 2022 being Date of last payment under resolution plan with effect from appointed date i.e date of NCLT Order being December 13, 2021. 4. The steel industry is highly cyclical and a decrease in steel prices may have an adverse effect on the Company's results of operations and financial condition.

Steel prices are volatile, reflecting the highly cyclical nature of the global steel industry. Steel prices fluctuate based on macroeconomic factors, including, amongst others, consumer confidence, employment rates, interest rates and inflation rates, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as the automotive, construction, packaging, appliance, machinery, equipment and transportation industries, which are among the biggest consumers of steel products. When downturns occur in these economies or sectors, our Company may experience decreased demand for its products, which may lead to a decrease in steel prices.

5. The production of steel is capital intensive, with long gestation periods.

The production of steel is capital intensive, with a high proportion of investment in fixed assets such as land, plant and machinery. If total capacity in the industry exceeds demand, there is a tendency for prices to fall sharply if there is ample supply. Conversely, if demand grows strongly, prices increase rapidly, as unutilized capacity cannot be brought on line as quickly. The result can be substantial price volatility. While we have taken steps to reduce operating costs, we may be negatively affected by significant price volatility, particularly in the event of excess production capacity in the global steel market and incur operating losses as a result.

6. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registration and permits, some of which may not have been obtained or expired and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory authority can impose fine on our company or suspend / cancel the approval/licenses which may affect our business adversely.

There are certain licenses for which we have recently made an application or have not applied for at all. For more information about the licenses applied for and required in our business and the licenses and approvals taken by our company please refer chapter titled "Government Approvals" appearing on Page no. 187 of this Prospectus.

Our factory licenses and clearance from pollution control board are issued in the name of the lessor of the premises where our factories are running and are not owned or issued in the name of our Company. Our Company is authorized to use these licenses only on the basis of license agreements entered into with the respective owners. In the event we are not able to renew any of our license agreements we may have to apply for fresh licenses and any delay in same may incur liability.

Further some of the permits, licenses and approvals etc. are granted for a fixed period of time and may expire and for which we may have to make an application for obtaining the approval or its renewal. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Moreover, there can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Further, certain statutory and regulatory authority may put certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely

affect our operations. For more information on the various statues applicable to our company, please refer chapter titled "*Key Industry Regulations*" appearing on Page no. 140 of this Prospectus.

We have not entered into any formal agreement with our suppliers, and hence we cannot be assured that all our raw material requirements will continue to be met by the suppliers. Our inability to obtain high quality raw materials in a timely and cost-effective manner would cause delays in our production and delivery schedules besides increasing cost of production, which may result in us losing some customers and hence could lead to reduction in revenues. Hence, we also face market risks for each of these products.

Other current liabilities	9.34	34.25	71.63	563.25	315.00
Short-term provisions	1.42	2.97	4.78	6.60	10.00
Total	12.70	2,964.20	1,699.88	2,383.30	1,498.00
Net Working Capital	**555.50**	**2,325.47**	**2,305.37**	**4,369.76**	**7,651.89**

Our Working capital requirements are in line with the industry standards. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page no. 93 of this Prospectus.

28. Our Company has a negative cash flow in its operating activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business

Our Company has incurred negative cash flows from our operating activities as well as investing activities during our operating history as per the Restated Financial Statements and the same are summarized as under:

(₹ In Lakhs)

Particulars	For the year ended			
	March 31, 2022	March 31, 2021	March 31, 2020	March 31, 2019
Net Cash Generated from Operating Activities	244.88	558.40	(1,470.14)	(521.71)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

29. Any misconduct by employees or our failure to comply with laws or regulations could weaken our ability to win contracts, which could result in reduced revenues and profits

Any misconduct, fraud, non-compliance with applicable laws and regulations, or other improper activities by our employees could have a significant negative impact on our business and reputation. Such misconduct could include the failure to comply with government procurement regulations, regulations regarding the protection of classified information, regulations prohibiting bribery and other corrupt practices, regulations on lobbying or similar activities and any other applicable laws or regulations. Our failure to comply with applicable laws or regulations or acts of misconduct could subject us to fines and penalties and result in reduced revenues and profits and could have a material adverse impact on our business, financial condition, and results of operations.

30. We may require additional financing for our business operations and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability. Further, fluctuations in interest rates could adversely affect our results of operations.

We may require additional capital for our business operations. Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors including our financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, security, our track record of compliance of the covenants contained in our financial agreements, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate. We cannot assure that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or obtain additional financing on acceptable terms and in a timely manner could adversely impact our ability to incur capital expenditure, our business, results of operations and financial condition.

Further, an increase in the interest rates on our existing or future debt will increase the cost of servicing such debt. An increase in interest expense may have an adverse effect on our business prospects, financial condition and results of operations.

For further details regarding our business refer chapter titled 'Business Overview' on page 116 of this Prospectus.

31. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

32. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.

Our Promoters – Directors are interested in our Company to the extent of their shareholding, interest on unsecured loans and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years, please

refer to the Annexure – 26" and Annexure 25 "Restated Standalone Related Party Transactions" and "Restated Consolidated Related" Party Transactions under Chapter titled "Restated Financial Information" beginning on page 194 of the Prospectus.

33. Labour unrest problems and shortage of labour may significantly affect our business and if our employees unionize, we may be subject to, slowdowns and increased wage costs

We believe that the steel industry in India is currently experiencing a shortage of labour. As a consequence, we face competitive pressures in recruiting skilled and unskilled labour and professionally qualified staff as and when we need them. We believe that we currently pay salaries / wages at market rate in order to secure an adequate number of skilled and unskilled labours; however, we may in the future need to pay remuneration that is above market rates which could result in lower profit margins for us. Further, there can be no assurance that increased salaries / wages will result in a lower rate of attrition. The loss of the services of our skilled and unskilled labour or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

In addition, India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and our business may be adversely affected.

We operate in a labour-intensive industry and we hire casual labour to work at our factory. In the event of a labour dispute, if we are unable to successfully negotiate with the workmen, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. Either of these factors could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers.

34. Our success largely depends on our Board and Key Managerial Personnel and our ability to attract and retain them. Any loss of our director and key managerial personnel could adversely affect our business, operations and financial condition

We depend significantly on the expertise, experience and continued efforts of our Directors Mr. Vipin Prakash Mangal, Mr. Chanakya Prakash Mangal and Mr. Chandragupt Prakash Mangal and our other key managerial personnel. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his / her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. For further details on the Management of our Company please refer to the chapter titled ―Our Management beginning on page 165 of this Prospectus.

35. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the "Objects of the Issue". Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details please refer to the chapter titled "Objects of the Issue" beginning on page no 93 of this Prospectus.

36. Certain information contained in this Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.

Certain information contained in this Prospectus like our funding requirements and our proposed use of issue proceeds is based solely on management estimates. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities or claims with respect to title of land, the

ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

37. We rely on third parties for manufacturing products of our Company.

To cater the demand of customers for SS Round bars and SS Bright bars, we get manufacturing of such products on job work basis from third party manufacturers to whom we provide the requisite billets.

Any decline in the quality of products manufactured or delay in delivery of products by such parties, or rise in job work charges may adversely affect our operations. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such manufacturers or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. Further we are also exposed indirectly to the risks of these manufacturers.

38. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section - Objects of the issue on page no. 93 of the Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue this may affect our revenues and results of operations.

EXTERNAL RISK FACTORS

1. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

2. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page no. 140 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

3. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price And liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. Almost 100% of our Revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

At present, we derive almost 100% of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the Steel industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Beeline Broking Limited as Lead Manager and also appointed Sunflower Broking Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

8. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ 101/- This price is be based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page no. 99 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per
- share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

9. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

10. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020. The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the Government of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing "shelterin- place" rules and "stay-at-home" orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Operations of our company were not classified as under essential category. Our offices and plants were closed from March 24, 2020 to June 2020. We resumed office and Plants from July 2020. However the office staff members have been working from home during lockdown. Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contact COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus.

In the second wave of covid-19 during, our plant was shut down for 2.5 Months due shortage of Oxygen, our plants were not operational as industrial usage of Oxygen gas was restricted by Government.

A rise in number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID- 19 is not effectively controlled. Although some restrictions have been eased.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

However, the investors with holdings of value less than ₹ 1,00,000 shall be allowed to offer their holding to the Market Maker(s) (individually or jointly) in that scrip provided that he/she sells his/her entire holding in that scrip in one lot along with a declaration to the effect to the selling broker.

3) Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.

4) After a period of three (3) months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 25% of Issue Size (Including the 3,25,200 Equity Shares ought to be allotted under this Issue). All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.

GLOBAL ECONOMY

Over the past year, the COVID-19 pandemic continued to affect countries around the world. It has caused a global health and economic crisis unprecedented in scale and impact, with overstretched health systems, widespread lockdowns, school closures, disruptions to food supply, and income losses that are disproportionately affecting the poor, women, the elderly, informal workers, and other vulnerable groups. The pandemic reversed decades of progress in reducing poverty, with about 100 million more people pushed into extreme poverty in 2020.

COVID-19—the fastest and largest crisis response in our history—seeks to save lives, protect the poor and vulnerable, achieve sustainable growth, and rebuild economies in better ways. Our commitments reached record levels in fiscal 2021, providing $157 billion through rapid and flexible financing mechanisms to help countries tackle the COVID-19 crisis and address their most pressing development needs. This includes support for countries affected by fragility, conflict, and violence, where millions of people face extreme poverty, food insecurity, and unprecedented levels of forced displacement.

The World Bank Group is one of the world's largest sources of financing and knowledge for developing countries. It consists of five institutions that share a commitment to reducing poverty, increasing shared prosperity, and promoting sustainable growth and development.

◆ International Bank for Reconstruction and Development (IBRD) lends to governments of middle-income and creditworthy low-income countries.
◆ International Development Association (IDA) provides financing on highly concessional terms to governments of the poorest countries.
◆ International Finance Corporation (IFC) provides loans, equity, and advisory services and mobilizes additional capital from other sources to stimulate private sector investment in developing countries.
◆ Multilateral Investment Guarantee Agency (MIGA) provides political risk insurance and credit enhancement to investors and lenders to facilitate foreign direct investment in emerging economies.
◆ International Centre for Settlement of Investment Disputes (ICSID) provides international facilities for conciliation and arbitration of investment disputes.

REGIONAL ENGAGEMENTS

The World Bank operates in 142 countries worldwide. The Bank continues to expand our presence on the ground in client countries—particularly in those affected by fragility, conflict, and violence—allowing us to work more effectively and efficiently with governments and other partners. As of June 2021, 97 percent of Country Directors/Country Managers and 47 percent of staff are based in seven geographic regions.

AFRICA

The COVID-19 pandemic has plunged Sub-Saharan Africa into its first recession in over 25 years and exacerbated public debt vulnerabilities, pushing up to 40 million people into extreme poverty and erasing years of progress in reducing poverty. Yet the region's economic activity is estimated to have contracted by only 2.4 percent in 2020 due to the virus spreading more slowly than expected, strong agricultural growth, and rapid recovery in commodity prices. African countries are also increasingly adopting digital technologies to boost productivity and increase employment opportunities, particularly for women and youth. Growth is expected to rebound to 2.8 percent in 2021 and 3.3 percent in 2022, though this will depend on more rapid deployment of vaccines, credible policies to stimulate private investment, and greater integration into regional and global value chains under the African Continental Free Trade Area.

The Bank Group is supporting regional integration across Sub-Saharan Africa and scaling up financing at the country level to help countries respond to the impacts of the pandemic and stimulate a green, resilient, and inclusive recovery. Support for regional integration complements national programs to build connectivity in energy, transport, and digital development; promote trade and regional value chains and integrate financial markets; support human capital development by enhancing pandemic and disease surveillance, boosting skills, and empowering women; and reinforce resilience to address challenges related to climate change, food security, and transboundary waters. We also work with partners to support cross-border approaches in fragile areas, such as the Sahel, the Lake Chad and Great Lakes regions, and the Horn of Africa.

EASTERN AND SOUTHERN AFRICA

World Bank assistance

In fiscal 2021, the Bank approved $15.6 billion in lending to Eastern and Southern Africa for 100 operations, including $1.5 billion in IBRD commitments and $14.1 billion in IDA commitments. Revenue from Reimbursable Advisory Services agreements with five countries was $8 million. This financing supports investments in the region's countries to respond to the impacts of COVID-19, protect livelihoods and create jobs, enhance food and water security, accelerate innovation, and promote inclusion.

Accelerating the digital economy and promoting green growth

To promote resilient growth, we are supporting Africa's vision to achieve universal and affordable access to information and communications technology for every individual, business, and government by 2030, with an interim goal to double broad and connectivity. To unlock the full benefits of this transformation and strengthen recovery, countries in Eastern and Southern Africa need to make investments that support digital infrastructure, including in reliable and affordable electricity, and develop workers' skills to better prepare them for the digital economy. In Mozambique, we are supporting a program that increases access to quality education and enhances teacher training, with a focus on ICT, science, technology, engineering, mathematics, and climate change. At the same time, we are working to increase energy access while supporting countries' clean energy transition. In fiscal 2021, 77 percent of our energy projects in Eastern and Southern Africa supported climate action. In Rwanda, the Energy Access and Quality Improvement Project is helping develop low-cost renewable energy and expanding grid connections for residential, commercial, industrial, and public sector consumers. The effort includes the Bank's largest clean cooking operation in Africa and is the first project co-financed by the Clean Cooking Fund, hosted by our Energy Sector Management Assistance Program.

Strengthening governance and community services

We work with countries to make the delivery of public services more efficient and inclusive and to improve the governance of institutions and public agencies, thereby promoting transparency, accountability, and resilience. In Angola, we are helping the government improve fiscal policy by introducing clear targets and transparency requirements. We also provided technical advice to Zimbabwe to improve the agility and accountability of emergency treasury operations, support real-time audits, and simplify processes for rapid appraisal and implementation to meet urgent needs.
Strengthening institutions lays the foundations for higher and more sustainable economic growth, which can help reduce the drivers and impact of fragility, conflict, and violence. The South Sudan Community Resilience and Local Governance Project is providing access to basic services for conflict-affected communities and returning refugees, aiming to reduce resource conflict at the local level, expand women's access to services, and integrate returning refugees.

In a crucial step forward, Sudan cleared its arrears to IDA in March 2021, enabling its full reengagement with the Bank Group after nearly three decades. This will allow the country to access nearly $2 billion in financing for poverty reduction and sustainable economic recovery over the next two years. We are supporting Sudan's reform agenda to make its economy more competitive, enhance transparency, increase investments, create jobs, and strengthen social protection.

EAST ASIA & PACIFIC

The economies of East Asia and the Pacific began to bounce back after a severe economic shock in 2020, but recovery has been uneven. Only China and Vietnam have followed a V-shape growth path, with output surpassing pre-pandemic levels in 2020. In the other major economies, output remained on average about 5 percent below previous levels, with

the smallest gap in Indonesia (2.2 percent) and the largest gap in the Philippines (8.4 percent). Economic contraction has been particularly severe and persistent in some of the small island economies, with output in 2020 more than 10 percent below pre-pandemic levels in Fiji, Palau, and Vanuatu.China and Vietnam are projected to grow by 8.5 percent and 6.6 percent, respectively, in 2021, while the rest of the region is projected to grow by only 4.0 percent. Recovery is expected to be especially protracted in tourism-dependent island economies, with growth projected to be negative in about half of these countries, despite their having been largely spared from direct impacts of the pandemic. Due to economic distress, poverty in the region stopped declining for the first time in 20 years; the crisis will prevent an estimated 29 million people from escaping poverty by the end of 2021. Inequality increased because of the pandemic and the resulting shutdowns, as well as unequal access to social support and digital technologies. In some countries, children of households in the bottom two-fifths of the population are 20 percentage points less likely to be engaged in learning activities than those in the wealthiest fifth.

World Bank assistance

The World Bank approved $7.9 billion for 38 operations in the region in fiscal 2021, including $6.8 billion in IBRD commitments and $1.1 billion in IDA commitments. The Bank also signed Reimbursable Advisory Services agreements with four countries for a total of $3.2 million. Our work in the region focuses on three main areas: human capital and inclusion, private sector–led growth, and resilience and sustainability—with the COVID-19 response being an integral part of our work in fiscal 2021. We continue to deepen our partnerships with some of the region's non-borrowing member countries, including Korea, Malaysia, and Singapore, allowing us to generate and exchange development knowledge, lessons, and solutions for shared development priorities. Addressing the COVID-19 crisis As part of the Bank's COVID-19 fast-track facility, we are implementing emergency projects in several countries, including Cambodia, Lao People's Democratic Republic, Papua New Guinea, and the Philippines. These projects provide emergency.

EUROPE & CENTRAL ASIA

Europe and Central Asia is forecast to expand 3.9 percent in 2021, predicated on a faster pace of vaccination in the region's largest economies during the second half of the year. However, the outlook remains challenging, with the pandemic worsening in recent months, as well as tighter macroeconomic policies, greater policy uncertainty, and geopolitical tensions. Growth is expected to stabilize at 3.9 percent in 2022. The pandemic could erase at least five years of per capita income gains in several countries and increase poverty by as many as 6 million people, largely due to job losses. Other shocks have also presented challenges for the region, including major earthquakes in Albania, Croatia, Greece, Tajikistan, and Turkey, as well as conflicts affecting the south Caucasus and eastern Ukraine. Europe and Central Asia is also home to 10 of the world's 20 most carbon-intensive economies, while natural resources—air, water, and forests—are being depleted at unsustainable rates. One in eight deaths in Europe can be attributed to pollution; in the Western Balkans, one in four.

World Bank assistance

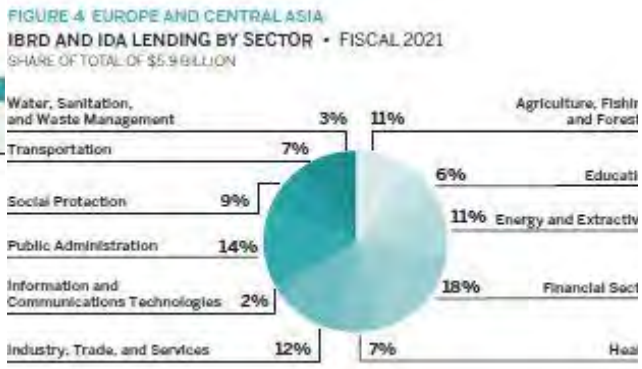

In fiscal 2021, the World Bank approved $5.9 billion in lending to the region for 51 operations, including $4.6 billion in IBRD commitments and $1.3 billion in IDA commitments. The Bank delivered 254 Advisory and Analytical Services, including regular economic reports for countries, as well as policy notes to support the crisis response in Albania, Bosnia and Herzegovina, Montenegro, and North Macedonia. Surveys in Central Asia and with the private sector in Kosovo provided key insights to underpin policy recommendations. We also helped countries across the region exchange good practices in crisis response. We are helping the region's countries prepare for a green, resilient, and inclusive recovery by building on our emergency response to the pandemic and focusing on the medium-term structural reform agenda. Our priorities here cover four broad areas: supporting a green transition, boosting human capital, enabling markets, and building and strengthening institutions.

LATIN AMERICA & THE CARIBBEAN

In the first year of the pandemic, Latin America and the Caribbean was the region hardest hit by COVID-19, with a sharp drop in economic activity and significant impacts on health and human capital coming after several years of sluggish growth and limited progress in social indicators. Regional GDP fell by 6.5 percent in 2020 and is expected to climb 5.2 percent in 2021. Poverty has risen sharply in many countries, although emergency measures have helped mitigate the regional impact. The share of households living in poverty was down slightly in 2020 at 21.9 percent, but the percentage of vulnerable people increased from 36.9 percent of the population in 2019 to 38.5 percent in 2020. The COVID-19 crisis will have a long-term impact on the region: lower levels of learning and employment are likely to reduce future earnings, while high levels of debt may strain the financial sector and slow recovery.

World Bank assistance

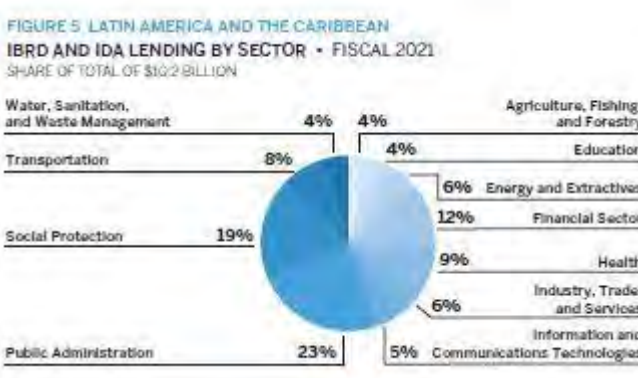

The Bank approved $10.2 billion in lending to the region for 49 operations in fiscal 2021, including $9.5 billion in IBRD commitments and $769 million in IDA commitments. We signed nine Reimbursable Advisory Services agreements with three countries for a total of $2.3 million. The World Bank supports the region's countries by protecting and investing in human capital; building resilience to better manage and withstand shocks; promoting inclusive growth; attracting private investment; strengthening institutions; and engaging with traditionally excluded groups, including Indigenous Peoples, A frodescendants, and rural communities. Over the past year, our work in these areas has focused on the response to the COVID-19 crisis—most notably on health, social protection, education, support to businesses, and job creation, as well as helping countries purchase and deploy vaccines. We will continue to support progress on structural reforms while investing in inclusion, gender equality, productive jobs, and climate resilience.

INDIAN ECONOMY

As of October 2021, India was the world's second-largest producer of crude steel, with an output of 9.8 Million Tonnes. In FY21, the production of crude steel and finished steel stood a 102.49 Million Tonnes and 94.66 Million Tonnes, respectively. In FY22, crude steel production in India is estimated to increase by 18%, to reach 120 million tonnes, driven by rising demand from customers. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

Indian steel industry is classified into three categories - major producers, main producers and secondary producers.

MARKET SIZE

In FY21, the production of crude steel and finished steel stood a 102.49 Million Tonnes and 94.66 Million Tonnes, respectively. According to CARE Ratings, crude steel production is expected to reach 112-114 Million tonne, an increase of 8-9% YoY in FY22. The consumption of finished steel stood at 93.43 Million Tonnes in FY21. Between April 2021 and September 2021, finished steel consumption stood at 49.11 Million Tonnes.

In May 2021, finished steel production stood at 7.8 Million Tonnes.

In June 2021, SAIL's crude steel production stood at 1.30 Million Tonnes and saleable steel production was 1.27 Million Tonnes.

Exports and imports of finished steel stood at 7.75 Million Tonnes and 2.37 Million Tonnes, respectively, in FY22 (until September 2021). In April 2021, India's export rose by 121.6% YoY, compared with 2020. In FY20, India exported 8.24 Million Tonnes of finished steel.

INVESTMENTS

Steel industry and its associated mining and metallurgy sectors have seen major investments and developments in the recent past.

According to the data released by Department for Promotion of Industry and Internal Trade (DPIIT), between April 2000 and June 2021, Indian metallurgical industries attracted FDI inflows of US$ 16.0 billion.

GOVERNMENT INITIATIVES

Some of the other recent Government initiatives in this sector are as follows:

- In October 2021, the government announced guidelines for the approved specialty steel production-linked incentive (PLI) scheme.
- In October 2021, India and Russia signed a MoU to carry out R&D in the steel sector and produce coking coal (used in steel making).
- In July 2021, the Union Cabinet, approved the production-linked incentive (PLI) scheme for specialty steel. The scheme is expected to attract investment worth ~Rs. 400 billion (US$ 5.37 billion) and expand specialty steel capacity by 25 million tonnes, to 42 Million Tonnes in FY27, from 18 Million Tonnes in FY21.
- In June 2021, Minister of Steel & Petroleum & Natural Gas Mr. Dharmendra Pradhan addressed the webinar on 'Making Eastern India a manufacturing hub with respect to metallurgical industries', organised by the Indian Institute of Metals. In 2020, 'Mission Purvodaya' was launched to accelerate development of the eastern states of India (Odisha, Jharkhand, Chhattisgarh, West Bengal and the northern part of Andhra Pradesh) through establishment of an integrated steel hub in Kolkata, West Bengal. Eastern India has the potential to add >75% of the country's incremental steel capacity. It is expected that of the 300 Million Tonnes capacity by 2030-31, >200 Million Tonnes pa can come from this region alone.
- In June 2021, JSW Steel, CSIR-National Chemical Lab (NCL), Scottish Development International (SDI) and India H2 Alliance (IH2A) joined forces to commercialise hydrogen in steel and cement sectors.

- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs. 200 crore (US$ 30 million).
- The Government of India raised import duty on most steel items twice, each time by 2.5% and imposed measures including anti-dumping and safeguard duties on iron and steel items.

ROAD AHEAD

The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31.

As per Indian Steel Association (ISA), steel demand will grow by 7.2% in 2019-20 and 2020-21.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

In FY22, demand for steel is expected to increase by 17% to 110 million tonnes, driven by rising construction activities.

Tata Steel in India is planning to expand its annual capacity from 34 Million Tonnes PA to 55 Million Tonnes PA by 2030.

Tata Steel is planning to expand its annual capacity in India from 34 Million Tonnes PA to 55 Million Tonnes PA by 2030.

Exports and imports of finished steel stood at 7.75 Million Tonnes and 2.37 Million Tonnes, respectively, in FY22 (until September 2021). In April 2021, India's export rose by 121.6% YoY, compared with 2020. In FY20, India exported 8.24 Million Tonnes of finished steel.

India's per capita consumption of steel grew at a CAGR of 4.43% from 46 kgs in FY08 to 74.10 kgs in FY19.

Government has taken various steps to boost the sector including the introduction of National Steel Policy 2017 and allowing 100% Foreign Direct Investment (FDI) in the steel sector under the automatic route. According to the data released by Department for Promotion of Industry and Internal Trade (DPIIT), between April 2000 and June 2021, Indian metallurgical industries attracted FDI inflows of US$ 16.0 billion.

The Government's National Steel Policy 2017 aims to increase the per capita steel consumption to 160 kgs by 2030-31. The Government has also promoted policy which provides a minimum value addition of 15% in notified steel products covered under preferential procurement.

In 2019, the Government introduced Steel Scrap Recycling Policy with an aim to reduce import.

The industry is also benefitting from the developments happening across various industries. The new Vehicle Scrappage policy will help in reducing the steel prices since the policy enables recycling the materials used in old vehicles. In the healthcare front, major steel producers are now exceeding their production capacities to produce oxygen cylinders for COVID patients. In 2021, Indian Railways is planning to procure over 11 lakh tons of steel from Steel Authority of India Limited (SAIL) for the track renewal and laying new lines across the country.

In October 2021, JSW Steel invested Rs. 150 billion (US$ 19.9 million) to build a steel plant in Jammu and Kashmir and boost manufacturing in the region.

In October 2021, Arcelor Mittal and Nippon Steel Corp.'s joint venture steel firm in India, announced a plan to expand its operations in the country by investing ~Rs. 1 trillion (US$ 13.34 billion), over 10 years.

In October 2021, the government announced guidelines for the approved specialty steel production-linked incentive (PLI) scheme.

In October 2021, India and Russia signed a MoU to carry out R&D in the steel sector and produce coking coal (used in steel making).

In June 2021, Mr. T.V. Narendran, CII president and MD of Tata Steel, in an interview with The Telegraph, stated that steel companies have firmed their plans to invest ~Rs. 60,000 crore (US$ 8.09 billion) over the next three years—this is was the biggest private sector investment plan announced in recent times.

In January 2021, the Ministry of Steel, Government of India, signed a Memorandum of Cooperation (MoC) with the Ministry of Economy, Trade and Industry, Government of Japan, to boost the steel sector through joint activities under the framework of India–Japan Steel Dialogue.

In July 2021, the Union Cabinet, approved the production-linked incentive (PLI) scheme for specialty steel. The scheme is expected to attract investment worth ~Rs. 400 billion (US$ 5.37 billion) and expand specialty steel capacity by 25 million tonnes, to 42 Million Tonnes in FY27, from 18 Million Tonnes in FY21.

According to CARE Ratings, crude steel production is expected to reach 112-114 Million Tonnes, an increase of 8-9% YoY, in FY22. This demand will be supported by economic recovery, government spending and enhanced liquidity. The Union Budget 2021-22 has a 34.5% YoY increase in allocation for capex at 5.54 lakh crore (US$ 74.60 billion). The budget's focus is on creating infrastructure and manufacturing to propel the economy. In addition, enhanced outlays for key sectors such as defence services, railways, and roads, transport and highways would provide impetus to steel consumption.

Stainless Steel (SS) Billets

200 Series:

The 200 series is a class of austenitic and highly corrosion-resistant stainless steel that are characterized by having low nickel content. They are also referred to as chrome-manganese (CrMn) stainless steel.

Austenitic steels include both the 200 and 300 series. Use of 200 series has doubled this decade. The 200-series grades are austenitic and are not magnetic.

Nickel is the most commonly used element to produce this crystal structure, but a post-World War II nickel shortage led to the substitution of nitrogen for nickel in the production of some austenitic corrosion-resistant steels. The 200 series of stainless steels were born.

The addition of manganese allows more nitrogen to be safely added, but nickel can't be completely removed from the alloy. The 200 series stainless steels are consequently characterized by their nitrogen and manganese content.

Characteristics of the 200 Series of Stainless Steels

Although it's corrosion-resistant, the 200 series has a lesser ability than the 300 series to protect against pitting corrosion. This occurs in environments that have high moisture and chlorine contents. The 200 series also have a lesser ability to protect against crevice corrosion, which results in stagnant liquid and high acid environments. The chromium content must also be reduced in order to decrease the nickel content, thereby lowering corrosion resistance.

Series 200 stainless steels have excellent impact resistance and toughness, however, even in low and cryogenic temperatures. They're generally harder and stronger than 300 series steels, primarily due to their higher nitrogen content which acts as a strengthener. Neither the 200 nor 300 series of stainless steels are magnetic because they are austenitic.
Austenitic steels are more expensive than their ferritic counterparts are, but the 200 series is cheaper to produce than 300 series steels because of its lower nickel content.
The 200 series steels suffer from lower formability and ductility than 300 series grades, but this can be improved with the addition of copper.

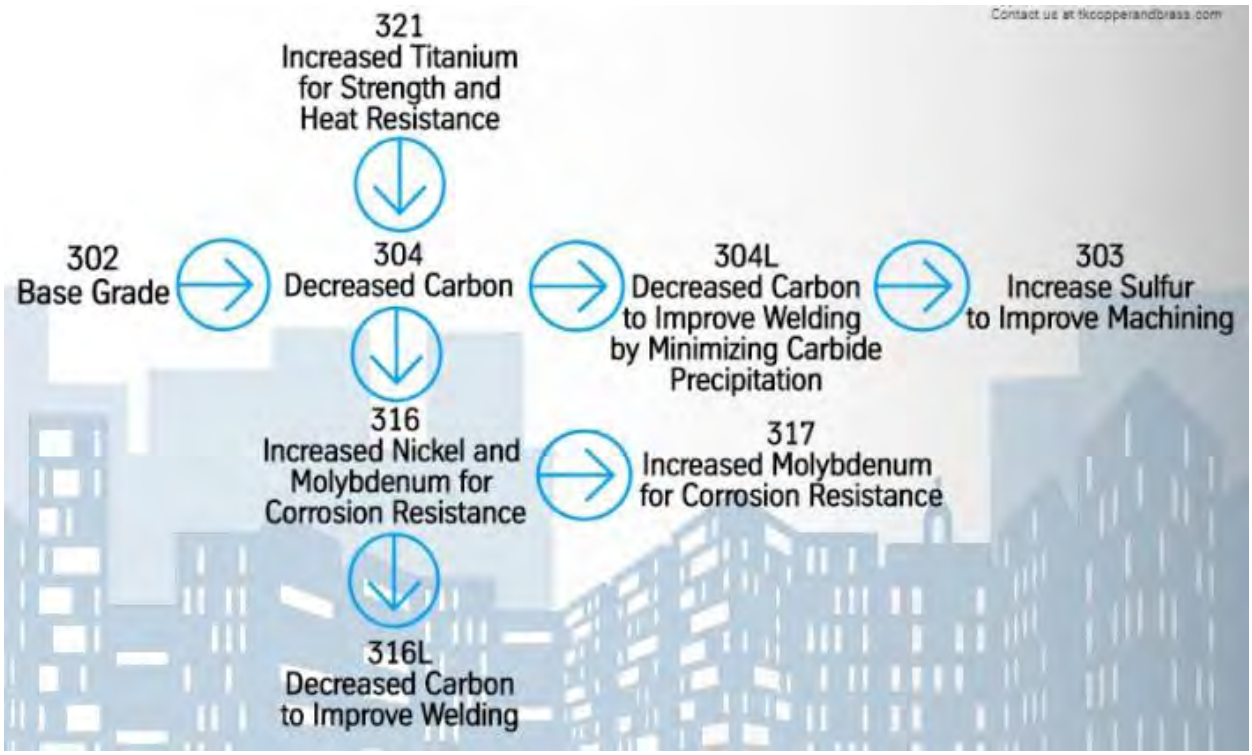

Application for 200 Series Stainless Steel

The range of applications for 200 series stainless steels is narrower than that of 300 series steels due to its lower corrosion resistance. It's not recommended for use in chemical environments, but it's having a vast market due to low cost and found its way into many household items. Some applications for 200 series stainless steel include:

- ✓ Household and Kitchen Appliances
  - Dishwashers and washing machines
  - Cutlery and cookware
- ✓ Tubes and Pipes
- ✓ Architecture and Decorative
- ✓ In-house water tanks
- ✓ Indoor and noncritical outdoor architecture
- ✓ Food and beverage equipment
- ✓ Automobiles (structural)
- ✓ Automobiles (decorative)

300 Series:

The 300 series stainless steels are classified as austenitic and are hardenable only by cold working methods. These grades of stainless have approximately 18% to 30% chromium and 6% to 20% nickel as their major alloying additions. Austenitic stainless steels are chromium-nickel alloys, which are hardened by cold working. Nickel is the main element varied within the alloys of this class while carbon is at low levels.

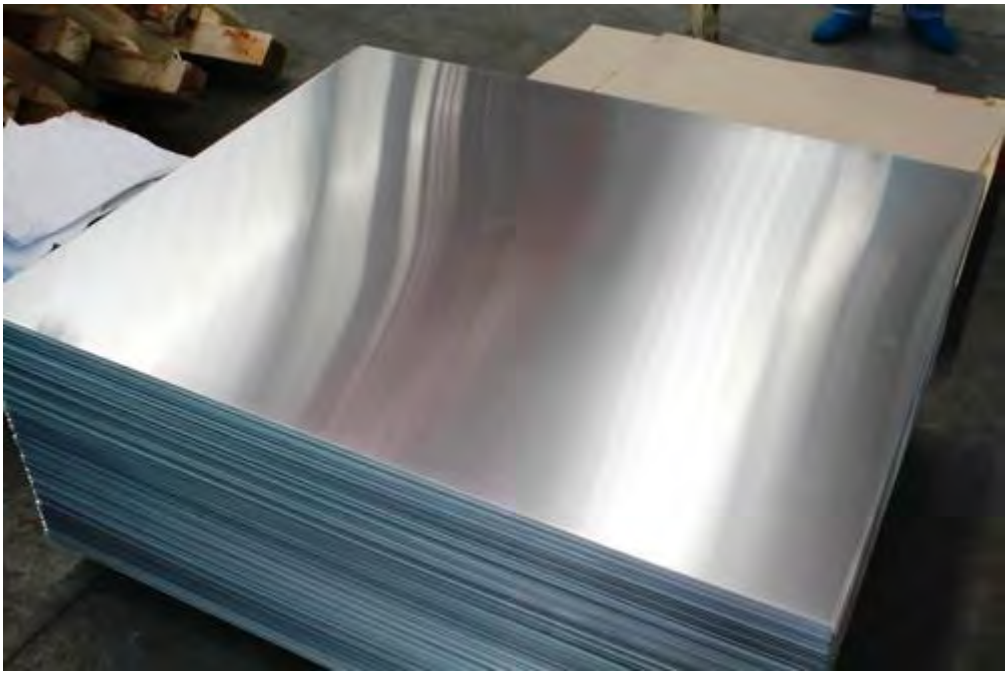

These alloys are slightly magnetic in the cold-worked condition but are essentially non-magnetic in the annealed condition. The austenitic types feature adaptability to cold forming, ease of welding, high-temperature service, and, in general, the highest corrosion resistance. This series of stainless steel alloys are known to resist corrosion while maintaining their strength at high temperatures. While the 304 grade is the most widely used alloy of all stainless steels, the 300 series grades are inventoried in stainless steel plate, sheet, bar, pipe, tube and fittings and much more.

Resistance to corrosion and staining, low maintenance, and familiar luster make stainless steel an ideal material for many applications where both the strength of steel and corrosion resistance are required. Moreover, stainless steel can be rolled into sheets, plates, bars, wire, and tubing. These can be used in cookware, cutlery, surgical instruments, major appliances, construction material in large buildings, industrial equipment (e.g., in paper mills, chemical plants, water treatment), and storage tanks and tankers for chemicals and food products. The material's corrosion resistance, the ease with which it can be steam-cleaned and sterilized, and the absence of the need for surface coatings have prompted the use of stainless steel in kitchens and food processing plants.

Application for 300 series (Stainless Steel) includes:

- ✓ Household and Kitchen Appliances
- ✓ Tubes and Pipes
- ✓ Architecture and Decorative
- ✓ Automobiles/Railways/Transportation
- ✓ Oil & Gas Sector
- ✓ Nuclear Application
- ✓ Pharmaceuticals and Dairy
- ✓ Power Plants

304 Stainless Steel:

304 Stainless Steel alloy is similar to 302 stainless steel alloy in terms of its corrosive, oxidation, and forming traits as well as its physical and mechanical abilities. 304 is a low carbon version of 302, or better known as 18-8. Its lower concentration of carbon makes it slightly weaker than 302 when in the annealed condition. 304 Stainless Steel Alloy has useful applications in welding because its reduced carbon footprint allows it to withstand some carbon precipitation (between 800-1500 degrees Fahrenheit), without the need for post-annealing assistance.

Stainless Steel 304 L has less carbon versus the regular 304. The "L" in its name refers to the "low carbon content." This alloy can be used in the welded form without being susceptible to intergranular corrosion. After the welding process, Stainless Steel 304L may require annealing due to the corrosive nature of the process. Stainless steel 304 has good machinability. Machining can be enhanced by using the following rules:

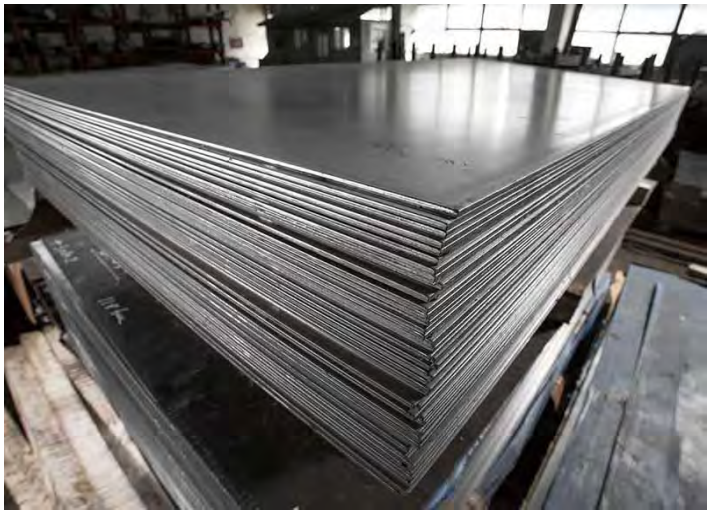

- Cutting edges must be kept sharp. Dull edges cause excess work hardening.
- Cuts should be light but deep enough to prevent work hardening by riding on the surface of the material.
- Chip breakers should be employed to assist in ensuring swarf remains clear of the work.
- Low thermal conductivity of austenitic alloys results in heat concentrating at the cutting edges. This means coolants and lubricants are necessary and must be used in large quantities.

Applications of Stainless Steel 304:

Stainless steel 304 is typically used in: -

- ✓ Sinks and splashbacks
- ✓ Saucepans
- ✓ Cutlery and flatware
- ✓ Architectural panelling
- ✓ Sanitary ware and troughs
- ✓ Tubing
- ✓ Tanks and containers for a large variety of liquids and solids
- ✓ Process equipment in the mining, chemical, cryogenic, food, dairy and pharmaceutical industries
- ✓ Springs, nuts, bolts and screws

316 Stainless Steel:

316 Stainless Steel Alloy, molybdenum bearing steel, can resist pitting with solutions that contain chlorides and halides. In extreme temperatures, this stainless steel series alloy has tensile, creep, and stress rupture strength. This durable alloy is also resistant to dilute solutions of 1-5% of sulfuric acid, as high as 120 degrees Fahrenheit.

When exposed to temperatures ranging from 800-1500 degrees Fahrenheit, 316 Stainless Steel is prone to carbon precipitation; as a result, the alloy is also prone to intergranular corrosion in the as-welded state. After the welding process, annealing will help improve the alloy's resistance to corrosion.

Applications of Stainless Steel 316:

The most familiar uses of type 316 stainless steel are:

- ✓ In the construction of exhaust manifolds
- ✓ furnace parts
- ✓ heat exchangers
- ✓ jet engine parts
- ✓ evaporators
- ✓ chemical processing equipment
- ✓ pharmaceutical and photographic equipment
- ✓ valve and pump parts, tanks,
- ✓ pulp and paper,
- ✓ Textile processing equipment's
- ✓ Parts that are exposed to marine environments.

400 series:

Ferritic and martensitic alloys form this series of stainless steel. These grades are available for heat treating. Providing a good combination of strength and high wear resistance. The corrosion-resistance properties are lower than 300 series.

The 400 series group of stainless steels typically have an 11% chromium and 1% manganese increase, above the 300 series group. This stainless steel series tends to be susceptible to rust and corrosion under some conditions although heat-treating will harden them. The 400 series of stainless steels have higher carbon content, giving it a martensitic crystalline structure that provides the end product with high-strength and high-wear resistance. The 400 series steels tend to be used in agricultural equipment, gas turbine exhaust silencers, hardware, motor shafts, and more.

400 series stainless steel varieties corrosion resistance and 300 series of stainless steel varieties, and usually 400 series stainless steel varieties corrosion resistance is better than 200 series of stainless steel varieties. The 400 series stainless steel varieties currently add trace niobium, titanium, copper and aluminum elements can improve its deep drawing performance, weld ability, corrosion resistance and high temperature strength can be partially replaced by 300 series stainless steel models.

400 series grades are usually used in agriculture equipment, motor shafts, surgical instruments, wear plates and turbines, etc.

The 400 series includes both ferritic and martensitic steels.

Ferritic steels: non-hardening steels, ideal for conditions in elevated temperatures. Typical applications for ferritic stainless steels include petrochemical, automotive exhaust systems, heat exchanges, furnaces, appliances and food equipment to name a few.

Martensitic steels: able to be hardened, ideal for a wide variety of common uses. Martensitic stainless steels are used extensively in cutlery, sport knives and multi-purpose tools.

Applications for 400 series stainless Steel includes:

- Tubes and Pipes
- Architecture/Decorative
- Automobiles/Railway/Transportation
- Coinage
- Consumer Durables
- Blades

PROCESS FLOW CHART

Halol (UNIT: I)

Purchase and Testing of Raw Material

The scrap and Ferro Alloys are purchased as per different grade requirements**.** The scrap received is tested and based on the requirement of finish goods it is used.

Charging Steel Scrap & Electric Furnace

The scrap is charged in the Electric Induction Furnace for melting. Additionally based on the finish goods composition requirement, the ferro alloys are added to provide the correct material chemistry. The electric furnace stage is called a smelting process of melting steel scrap into molten metal. An electric furnace uses electricity to melt steel scrap. Our Company utilizes the electric furnace to melt steel scrap and removes impurities to generate liquid/molten steel during this process.

AOD (Argon Oxygen Decarburization)

After melting stage the material goes to the AOD – Argon Oxygen Decarburization process. Here the molten material is further processed to make it low carbon stainless steel and to further purify the material. This stage involves blowing of gases like oxygen, nitrogen and argon through the submerged tuyeres of the AOD vessel. Also ferro alloys and other metal scrap is added to achieve the finish chemistry required for the material.

AOD provides an economical way to produce stainless steel with a minimal loss of precious elements. It is part of a duplex process in which scrap or virgin raw materials are first melted in an electric induction furnace. The molten metal is then decarburized and refined in a special AOD vessel to less than 0.05% carbon. The key feature in the AOD vessel is that oxygen for decarburization is mixed with argon or nitrogen gases and injected through submerged tuyeres. This argon dilution minimizes unwanted oxidation of precious elements contained in specialty steels, such as chromium. Also ferro alloys and other metal scrap is added to achieve the finish chemistry required for the material.

Continuous Casting/Refining

After AOD process the material is transferred to Continuous Casting Machine or to Pit site for casting as bottom poured ingots.

This is a process of making the ladle-refined steel into billets. Throughout the continuous casting, the steel that has so far remained liquid is solidified into a shape. The ingots are made in various sizes as per customer requirements and mould sizes. The continuous casting machine makes billets in various sections from 100 mm to 200 mm.

The semi-finished billet is utilized to produce a wide range of products after various processes. The ladle serves to increase the temperature of the molten metal transported from the electric furnace and adjust the composition of five chemical properties of steel including C, Mn, Si, P and S in accordance with the related regulations. The properties and temperature of steel are significant factors to decide the quality and shapes of steel.

Basically, process goes through stringent testing to maintain the optimal chemical composition of steel. Moreover, it improves the stability and productivity of the subsequent continuous casting process by maintaining the molten steel temperature at between 1,550 and 1,600 °C.

- The billets/ingots is the first stage finish product.
- The billets/ingots are dispatched to customers in certain industry segments for manufacturing of various steel components or for re-rolling.
- Billets made in the continuous casting process are fed into the mill through an automatic transfer system.

Changodar (Unit: II)

Rolling Mill SS Flat Bars

Our Changodar (Unit II) has reheating furnace installed which reheats the billets received from Halol (Unit I). Thereafter the billets are passed several strands of rolling mills to make SS flat bars.

Duty Drawback Scheme

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the "Drawback Rules") have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all industry rate or duty drawback rate, or where the all industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. The time weightage factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the period/year.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

All communications will be addressed to the First Applicant and will be dispatched to his or her address as per the Demographic Details received from the Depository.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications

II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.

III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of "know your client" norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

The Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII sub-accounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.

2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.
